Response to Arguments

1. Applicant's arguments with respect to claims have been considered but are moot in view of the new ground(s) of rejection.

Claim Rejections - 35 USC § 112

2. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter, which the applicant regards as his invention.
3. Claim 43 recite the limitation "said first output flow identifier" in 13-14. Claims 44 and 45 depend on claim 43 therefore claims 44 and 45 are rejected as well. There is insufficient antecedent basis for this limitation in the claim.
4. Claim 46 recite the limitation "said first pipeline cycle" in line 10. Claim 47 depends on claim 46 therefore claim 47 is rejected for the same reason claim 46 is rejected. There is insufficient antecedent basis for this limitation in the claim.
5. Claims 46 and 47 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. Regarding claim 46, Applicant is claiming in line 5, "a network to said network", which is not clear to Examiner as to exactly what Applicant is claiming.

Allowable Subject Matter

6. Claims 1-4, 6-10, 13-42 and 48-50 are allowed over prior art.
7. Claim 5 is objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Art Unit: 2667

8. The following is a statement of reasons for the indication of allowable subject matter:

Although the prior art teaches flow control associated with a packet data communication system wherein the architecture includes CAM lookup to determine action indicated by rule-based routing/switching schemes, CAM produces an index pointers which are used for pointing to actions associated with packet processing, plurality pipelines, lookup pipeline controls the CAM and handles flow control and the interfacing between flow label queue and the CAM, forwarding engine/forwarding engine interface, CAM interface pipelines contain multiple stages, logic unit coupled to both interfaces and register, tagging rules associated with lookup, packet flow consisting of various sizes, pipeline registers, input interface/output interface they fail to teach/suggest fetching input flow information that identifies where input capacity information for a packet is located and comparing within another of said stages an input capacity for a packet with packet size and indicating whether said packet is conforming/non-conforming based upon said comparison, a second pipeline stage that operates to retrieve one or more parameters that describe said first input rate so that it can be determined if said sending of said first packet conforms to said first input rate, and a first interface/second interface that receives information indicative of packet size/receives flow information and an input flow information comprising a pointer to information describing an input bucket for a packet.

9. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after

Art Unit: 2667

the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
